In economics, an externality is a cost or benefit that is imposed on a third party who did not agree to incur that cost or benefit. For the purpose of these statements, overall cost and benefit to society is defined as the sum of the imputed monetary value of benefits and costs to all parties involved. The concept of externality was first developed by economist Arthur Pigou in the 1920s.

Single-use food packaging is taking a huge toll on our environment. As our landfills and waterways are increasingly clogged with plastic bags, Styrofoam food containers, disposable coffee cups and more, it's clear that the convenience of food packaging is outweighed by the waste and pollution that the packaging leaves behind. Something less widely understood is that this same food packaging ...

Food Packaging Is Bad for the Environment | FoodPrint

The high cost of the US health care system does not buy uniformly high quality of care. Concern about low quality has prompted two major types of public policy responses: regulation, a top-down approach, and report cards, a bottom-up approach. Each can result in either functional provider responses, which increase quality, or dysfunctional responses, which may lower quality. What do we know ...

Top-Down and Bottom-Up Approaches to Health Care Quality ...

FAQ 2.2: What Do Energy Supply and Demand Have to do with Limiting Warming to 1.5°C? Summary: Limiting global warming to 1.5°C above pre-industrial levels would require major reductions in greenhouse gas emissions in all sectors.But different sectors are not independent of each other, and making changes in one can have implications for another.

Chapter 2 — Global Warming of 1.5 °C - IPCC

Land-based responses to climate change can be mitigation (e.g., renewable energy, vegetation or crops for biofuels, afforestation) or adaptation (e.g., change in cropping pattern, less water-intensive crops in response to moisture stress), or adaptation with mitigation co-benefits (e.g., dietary shifts, new uses for invasive tree species, siting solar farms on highly degraded land).
